

ENVIROLIFT

Systems

Commercial Construction Advantages

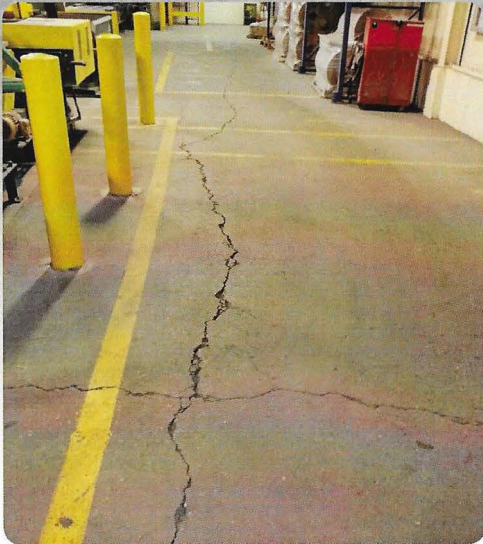

EnviroLift Systems has many applications for the commercial construction industry

- Harness the expansive force of high density, industrial grade polyurethane foam for concrete lifting and levelling
- Bind and strengthen soil for infrastructure rehabilitation and new construction projects
- Improve soil stability and strength prior to construction
- Specially engineered foam for void fill applications
- Comprehensive ground penetrating radar scanning for concrete inspection and analysis

Advantages

- **Waterproof**
- **Zero excavation**
- **Cost effective**
- **Increase load bearing capabilities**
- **Minimal downtime**
- **Green- non toxic**

Applications

- **Concrete lifting and levelling**
- **Soil stabilization**
- **Void filling**
- **Structural support**
- **Warehouse/shop/building floors**
- **Loading docks**
- **Machine pads**
